Chandigarh, August 19, 2016: As part of its drive on the occasion of Akshay Urja Diwas to generate awareness among citizens about the urgent need to opt for renewable sources of energy to contain environmental degradation, Hartek Power Pvt Ltd, a key player in the rooftop solar segment in Chandigarh, organised poster making and slogan writing competitions in four schools across the Tricity in which more than 500 students participated.

Organised on the theme of "Clean and Green Energy for a Better Future", the twin competitions conducted in Sacred Heart Convent School, Sector 26, Chandigarh; Sri Guru Gobind Singh Collegiate Public School, Sector 26, Chandigarh; Saupin's School, Sector 70, Mohali and Satluj Public School, Sector 4, Panchkula saw enthusiastic participation of Class 8 students, bringing out their creative best.

Providing much needed exposure to the winning students to speak at a public forum, Hartek Power will be giving the first two winners from each category an opportunity to articulate their views on renewable energy on a leading FM channel on August 20, Saturday.

Renowned city-based artists Diwan Manna and Vinay Vadhera were the judges of the two competitions. Impressed by the creative skills of the participants, the two judges said, "The students gave such thought-provoking messages that we had a really tough time deciding the winners."

While Diwan Manna is an art photographer known for his soulful images which are a combination of photography and painting, Vinay Vadhera is a painter who has shot into fame for his breathtaking masks and paintings.

Appreciating the efforts put in by the participating students, Ms Keerti Singh, Director, Human Resources, Hartek Power Pvt Ltd, said, "We are really impressed by the original ideas put forth by the students. The future in India belongs to renewable energy, and these competitions coinciding with Akshay Urja Diwas are part of our endeavour to create awareness among people on how renewable sources of energy can lead to a sustainable future and limit the damage to the environment."
