

Hartek Power launches hi-tech switchgear panel in Rajasthan

Hartek Power has introduced a 33 kV medium-voltage panel under the brand Hartek-Schneider for a 5 MW solar plant commissioned in Rajasthan. The company has been manufacturing medium-voltage panels up to 11 kV with Schneider providing the switchgear technology. The 33 kV Hartek-Schneider panel has a compact, versatile and highly reliable design and employs the latest technologies and safety measures as per global standards. The product's quality has helped the company win several 33 kV panel orders.
