CHANDIGARH: Chandigarh-based Hartek Power is targeting to double its total commissioned solar engineering, procurement and construction (EPC) projects to 500 MW by the end of the current financial year.

"Timely project completion is a major strength in case of solar power, unlike long duration implementation period in case of thermal and hydro projects," Chairman Hartek Singh told ET.

*"Timely project completion is a major strength in case of solar power, unlike long duration implementation period in case of thermal and hydro projects," Chairman Hartek Singh said.*
