

At LPU, power sub-station commissioned in 78 days

TRIBUNE NEWS SERVICE

JALANDHAR, SEPTEMBER 11

Hartek Power, one of India's fastest growing engineering, procurement and construction (EPC) companies based in Chandigarh with expertise in executing high-voltage turnkey substations and power infrastructure projects, has commissioned a 66/11 KV sub-station at Lovely Professional University in a record period of 78 days.

Going by industry standards, it usually takes four-five months to complete a 66/11-KV substation. However, the company has set a new benchmark by commissioning the project in nearly half the time.

Hartek Power chairman and managing director Hartek Singh said, "Hav-

ing set our eyes on completing the LPU sub-station project before the commencement of the new academic session, we left nothing to chance. We share a strong bond with leading capital power equipment manufacturers across India."

Credited with executing more than 130 substations in the past seven years, Hartek Power has handled substation projects in 17 states across the country. It has been entrusted by various state electricity boards with substation projects worth Rs 60 crore, which are likely to be commissioned in this financial year. The company is also holding final-stage talks for executing substations for 200-MW solar projects in the country in the current financial year.
