

Mohali based Simarpreet Singh makes it in the Top 100 Powerful and Influential Sikhs in the world

Ø The young entrepreneur with a mission to create a better and sustainable future makes his place among the Sikh Group's Top 100 most Powerful and Influential Sikhs under age of 30 in the world.

Chandigarh, July 15, 2020: Mohali based young entrepreneur Simarpreet Singh who had also made it to the coveted Forbes 30 Under-30 Asia list of achievers for his mission to power every household with clean and reliable solar power, has been named among 100 most influential Sikh personalities under 30 years of age in the world by a UK-based global Sikh organization.

Simarpreet Singh, 29 who is the Director at Hartek Group has been selected for the award by 'The Sikh Group', a global organization recognizing people of Sikh faith from around the world. The Group is growing from strength to strength each year, highlighting Sikh excellence throughout the world via various projects.

Simarpreet has been credited with starting the rooftop solar division of Hartek Group in the form of Hartek Solar Private Limited. The company provides complete roof top solar solutions for industrial, commercial and residential buildings.

Hartek Solar in a short span has also been named as one of the Top 10 Rooftop Solar installers in India, emerged as the first company to launch rooftop solar kits equipped with a unique remote sensing technology. Simarpreet is credited with making the remote sensing technology that has largely remained confined to large rooftop solar installations.

"Sustainability was at the core of the very idea behind founding Hartek Solar. Renewable energy is the only solution to solve the climate change issue and truly build a sustainable ecosystem for our future generations" said Simarpreet Singh.

The company is on a mission to provide clean and affordable power to all and has installed many prestigious projects across the country. The company has executed many projects at Gurudwara's and religious institutes as well to create more awareness about clean energy.
